

(b) State agencies should restrict the period of public notice, receipt of comments, hearing proceedings and final decision-making to the minimum time necessary to inform the public, obtain sufficient comment, and develop a reasonable decision on the matter. If the State agency has not issued a decision within three months following commencement of State agency review, it shall notify the applicant and the Federal agency of the status of the matter and the basis for further delay.

(c) If the State agency issues a concurrence or is conclusively presumed to concur with the applicant's consistency certification, the Federal agency may approve the Federal license or permit application. Notwithstanding State agency concurrence with a consistency certification, the Federal permitting agency may deny approval of the Federal license or permit application. Federal agencies should not delay processing applications pending receipt of a State agency's concurrence. In the event a Federal agency determines that an application will not be approved, it shall immediately notify the applicant and the State agency.

§ 930.64 State agency objection to a consistency certification.

(a) If the State agency objects to the applicant's consistency certification within six months following commencement of review, it shall notify the applicant, Federal agency and Assistant Administrator of the objection.

(b) State agency objections must describe (1) how the proposed activity is inconsistent with specific elements of the management program, and (2) alternative measures (if they exist) which, if adopted by the applicant, would permit the proposed activity to be conducted in a manner consistent with the management program.

(c) During the period when the State agency is reviewing the consistency certification, the applicant and the State agency should attempt to agree upon conditions, which, if met by the applicant, would permit State agency concurrence. The parties shall also consult with the Federal agency responsible for approving the Federal license or permit to ensure that proposed conditions satisfy Federal as well

as State management program requirements.

(d) A State agency objection may be based upon a determination that the applicant has failed, following a written State agency request, to supply the information required pursuant to § 903.58. If the State agency objects on the grounds of insufficient information, the objection must describe the nature of the information requested and the necessity of having such information to determine the consistency of the activity with the management program.

(e) A State agency objection shall include a statement informing the applicant of a right of appeal to the Secretary on the grounds described in Subpart H.

§ 930.65 Federal permitting agency responsibility.

Following receipt of a State agency objection to a consistency certification, the Federal agency shall not issue the Federal license or permit except as provided in subpart H of this part.

§ 930.66 Availability of mediation for previously reviewed activities.

(a) Federal and State agencies shall cooperate in their efforts to monitor Federally licensed and permitted activities in order to make certain that such activities continue to conform to both Federal and State requirements.

(b) The State agency shall request that the Federal agency take appropriate remedial action following a serious disagreement resulting from a State agency objection to a Federally licensed or permitted activity which was: (1) Previously determined to be consistent with the State's management program, but which the State agency later maintains is being conducted or is having coastal zone effects substantially different than originally proposed and, as a result, is no longer consistent with the State's management program; or (2) previously determined not to be an activity affecting the coastal zone, but which the State
